

NOTE :

Third party resources used to make the interface :

1. CSS : Skeleton
2. JS : JQuery, JQuery.Slides, Prefix Free, Modernizr, Respond
3. FONTS : Websymbols, Arial, Lucida Grande, Annifont, Capricorn OSF
4. IMAGES : icann.png, verisign.png

Links to look into if found necessary :

1. <http://www.getskeleton.com/> (skeleton css framework)
2. <http://slidesjs.com/> (jquery.slides)
3. <http://leaverou.github.io/prefixfree/> (Prefix Free)
4. <http://modernizr.com/> (Modernizr)
5. <https://github.com/scottjehl/Respond> (Respond)

frontend/js/frameworks.combined.js is a combination of

1. jquery-1.10.2.min.js
2. modernizr.js
3. prefixfree.min.js
4. respond.min.js

frontend/js/**behaviour.js** contains the functioning of interface elements such as

1. Hiding and showing **dropdown menu** on clicking **Products** button.
2. Hiding and showing **mini cart**.

backend folder contains interface elements broken into several sections (html structure enclosed in php files), when properly combined, generates proper output as done in the following files :

1. cart.php
2. domain.php
3. domainsearch.php
4. hosting.php
5. index.php
6. signin.php
7. signup.php

The files only contain the visual design for different sections of website.

View Insights :

Q

Form for searching domain is submitted to domainsearch.php which contains the visual design for searched domains ready to be dropped into cart.

My Account

Items : 4

(Show)

Click (Show) or (Hide) to toggle mini shopping cart.

Clicking on Check Out button or 'Items : 4' will redirect to cart.php which contains the visual design for the main cart and to place order.
